

Capacity Building

The CCSIS's objective with respect to capacity building is to further develop climate change skills of professionals and practitioners.

Over the coming year the CCSIS plan to achieve this by building on the success of, and use experience from, EIANZ's Climate Change Skills Training program 2008-11 and, more recently, the Learning to Adapt series. In addition to this the CCSIS will explore opportunities provided by the EIANZ's STEP program.
