

EIANZ Climate Change Special Interest Section

Communication

The CCSIS communications actions target three main areas:

- We would like to capture the initiatives, suggestions and contributions from members of the CCSIS to improve our action planning and delivery.
- We want to facilitate broader EIANZ member involvement in the issues being addressed by the CCSIS by providing information and more opportunities to participate in discussion and actions.
- We want promote the idea that the CCSIS Advocacy, Certification and Capacity Building activities are integrated in a positive feedback process supported by appropriate governance structures.
