## Urban Renewal – Not Only Fishermans Bend

*Getting the policy and regulatory settings right*

**EIANZ Victoria** with the **Australasian Land & Groundwater Association** invite you to join our expert presenters and panel to explore the role and importance of the policy and regulatory landscape in facilitating redevelopment of urban renewal sites. Iconic sites like Fishermans Bend and Barangaroo are key pieces of the urban renewal jigsaw, but the overall picture is of a city transforming its industrial and manufacturing history to accommodate a rapidly growing population.

This seminar will provide a comparative perspective on the complex variety of urban renewal projects and will discuss the following:

- What are the key issues and challenges?
- What policy conditions and legal framework is required to make these projects work?
- How does the market view these projects, what conditions are required to make them attractive to investors and property developers?
- What has been done well and what was failed?
- What are the lessons learnt from existing and completed projects?

KING & WOOD  
MALLESONS
