

PRACTICAL SKILLS TRAINING FOR CLIMATE CHANGE WORKSHOP

21st July 2010, Melbourne Convention and Exhibition Centre
in conjunction with the Enviro 2010 Conference and Exhibition

ENVIRONMENT
INSTITUTE OF
AUSTRALIA AND
NEW ZEALAND

Heard a lot about Climate Change but not sure how to tackle it?

Looking to gain skills to help you to effectively understand and manage climate change impacts relating to your business, customers or local area?

The Environment Institute of Australia and New Zealand (EIANZ) is running a practical skills training for climate change session as part of Enviro 2010!

How could the Practical Skills Training for Climate Change session help me?

This session aims to provide environmental professionals with a broad grounding in climate change issues. The course will focus on providing attendees with practical skills in responding to climate change.

The session will be presented by knowledgeable professionals from industry, consultancy, government and academia, each with a proven track record in implementing successful, practical strategies or actions to help businesses succeed. The program includes sessions on: setting the scene for climate change mitigation and adaptation, the legislation and policy context, how to conduct a climate change risk assessment and how best to develop a climate change strategy.

Who is the session for?

The event is targeted at environmental professionals and those working in SMEs or other businesses who would like to gain a broad understanding of climate change issues, with a particular focus on developing fundamental practical skills in this area.

This session is part of a national EIANZ skills training program partly funded through the Australian Government's Department of Climate Change through its 'Climate Change Adaptation Skills for Professionals Program'.
