Regulatory Strategy

Changes and opportunities

Omar Ameer
Director
1. Setting the standards
2. Applying the standards
3. Monitoring performance
4. Responding to performance

Focus of previous regulatory framework

Focus of new regulatory strategy
What has changed?
Innovative Regulation In Action

Our New Business Model

• Business centre “centres of excellence” for a particular business sector
  • Cairns – metal mining
  • Emerald – coal mining
  • Charleville – macropods
  • Brisbane – industry and development
  • Brisbane – petroleum and gas
  • Brisbane - EIS

Compliance centres
What is changing

• Officers will identify risks and provide advice about where to find solutions, but will not solve a customer’s problems for them

• Transitional environmental programs will not be available where a company is out of compliance through its fault

• If a customer fails to achieve an outcome required by their approval, enforcement action will follow
What does this mean for you?

• Getting the approval is the easy part

• What does your client need to know?

• Different opportunities to add value
