

URBAN WILDLIFE PROJECT

National Science Week 2015

Thank you for enquiring about the Urban Wildlife Project. Please provide the following information so that we can assess how we can work with you.

Our aim is to capture footage of 1) as many different native species as possible, and 2) at as many locations as possible around urban areas. The field component of this project will be completed during June and July 2015.

Final locations for the camera trapping will be based on the following criteria

- Reported or likely wildlife species and numbers
- Your location and on-ground access
- Security of the equipment

Please provide the following information

Your name _____

Your contact telephone number _____

Where the wildlife would be filmed

Street address _____ Suburb _____

Please describe the area/habitat in which the wildlife is observed (for instance backyard, paddock, street, nature reserve)

Describe the species/evidence of wildlife that you have on your property.

Please include photographs of wildlife or their footprints/scats (droppings) if you have them. _____

How often and when do you observe these animals? (every night, most nights, dawn/dusk) _____

Do you have any other information you wish to provide? _____

Thank you for providing this information. We will be in touch soon.
