

The future of environmental governance

Probable scenarios and the views held by practitioners

Paul Schmidt, University of Queensland

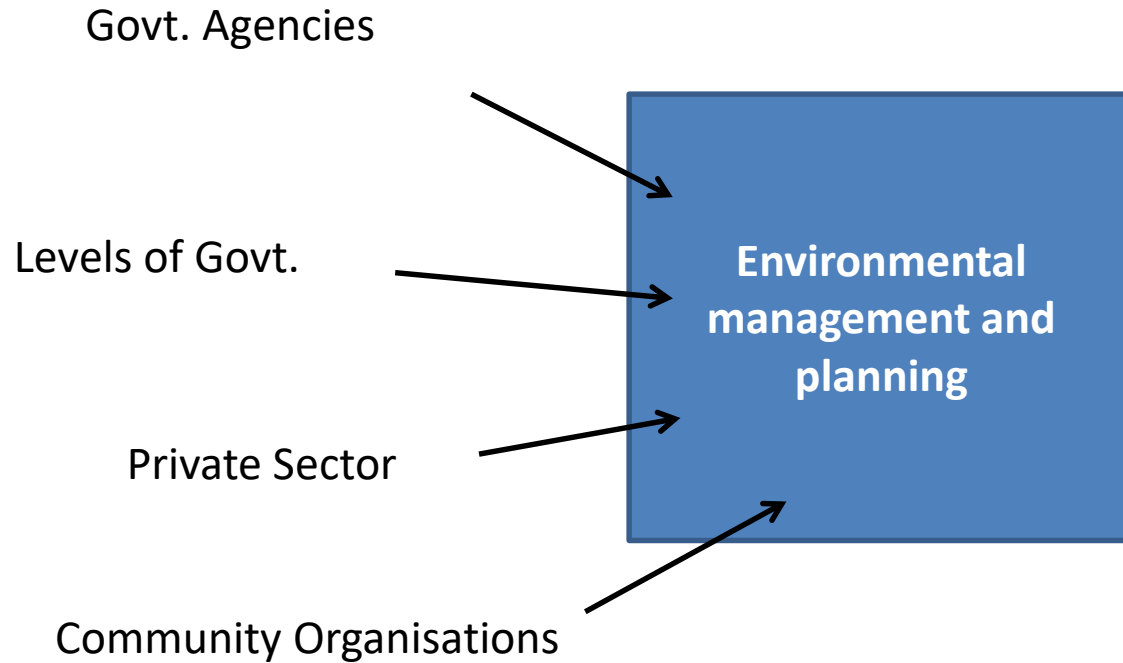

paul.schmidt@uq.edu.au

Outline

- Environmental governance and change
- Current trends
- Probable future scenarios
- Your perceptions on these scenarios and the environmental profession.

What is environmental governance?

Change in 2 metropolitan areas

Brisbane
Australia

Portland
USA

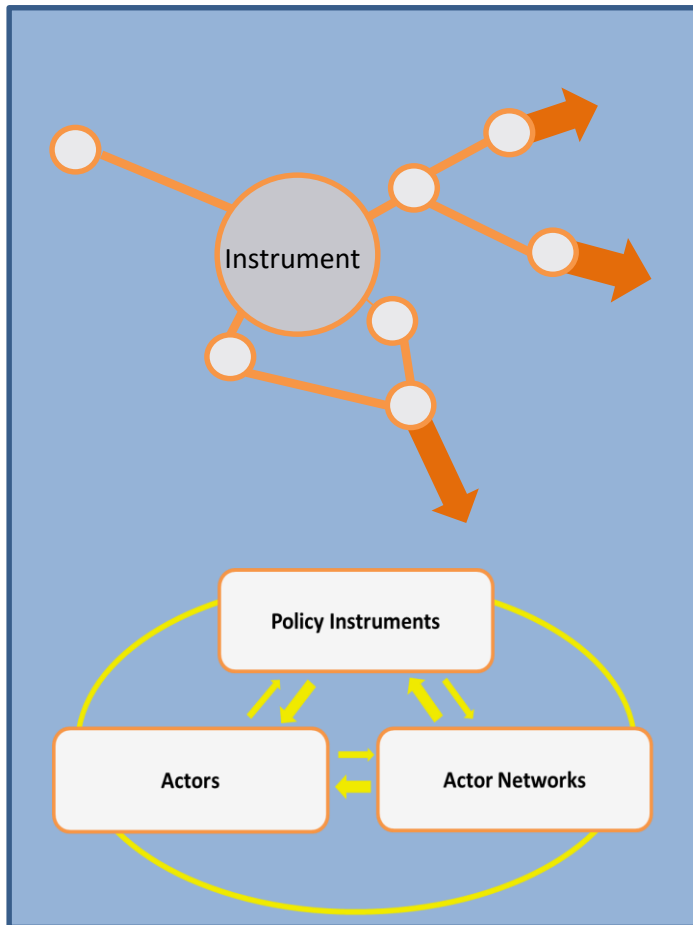

- Regulations
- Service provision
- Community participation
- Coordination across the instrument mix
- More!

NOMI.

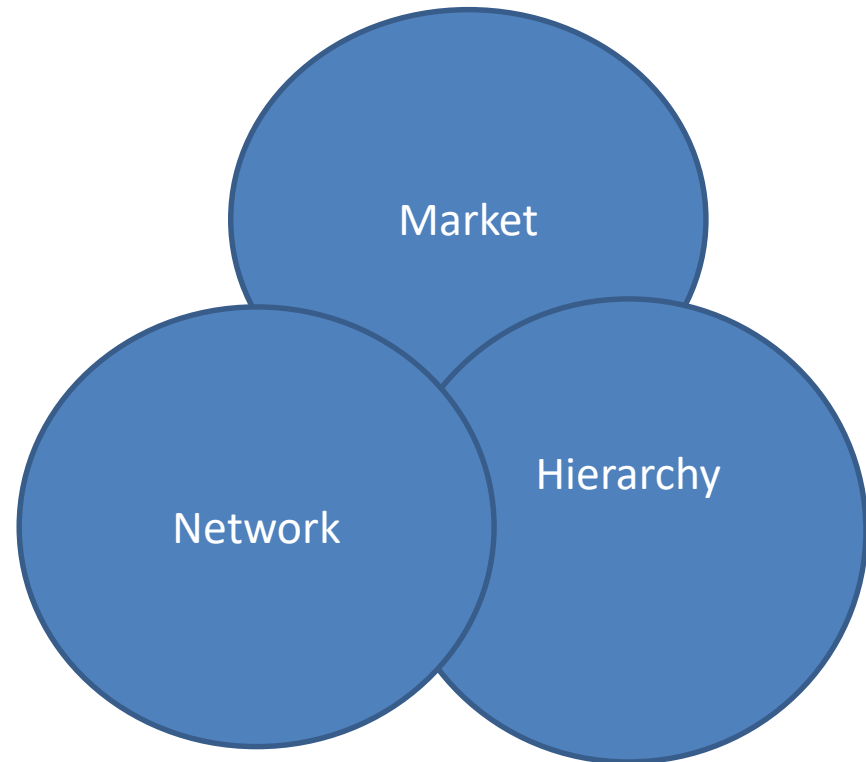

What is environmental governance?

Brisbane Arenas	Main structural types / instruments
Constituent 53% (n=97)	i.e...Strategies and plans Collaborative forums Events Publications and reports
Distributive 22% (n=38)	i.e. Service delivery Grants/funding instruments Land acquisition
Regulative 21% (n=33)	i.e. Zones and codes Legislation
Redistributive 3% (n=6)	Employment programs Transfer of program Roll up into other instrument

Styles of governance

- Governance styles have their own organising logic
- Each logic has its own typical failures;
- Governance styles may undermine each other;

Assumptions about change

Change in 2 metropolitan areas

Patterns of change

Main patterns:

- Increase in technical approaches
- Increased institutionalisation
- Increased scale
- Increased integration
- Increase in networks

Steering influences:

- Jurisdictional structure
- Perceived history
- Perceived future
- Instrument types
- Levels of competition
- Levels of stability

Collaborative **Competitive**

SURVEY PART B

➤ **Source:** "2499 - Athens - Temple of Athena Nike being restored - Photo by Giovanni Dall'Orto, Nov 11 2009" by Giovanni Dall'Orto. - Own work. Licensed under Attribution via Wikimedia Commons

Collaborative **Competitive**

Stable

Unstable

Competitive

Stable Market

- Contested valuation, agreed exchange system
- predictable practitioner specialisation,
- ongoing increases in technical capacity & opportunities for implementation
- intra-sectoral role specialisation
- contractual cross-sectoral relationships
- low government and community capacity
- Rational style lobbying
- Practitioners use service based strategies to achieve goals

Shifting Sands

- Contested valuation & contested exchange system
- Novel practitioner specialisation,
- Fluctuating technical capacity & opportunities for implementation
- Adhoc/opportunistic politicised lobbying
- Practitioners use entrepreneurial strategies to achieve goals
- Intra-Sectoral role diversification
- Opportunistic cross sectoral relationships
- Variable/fluctuating government & community capacity

Competitive

Unstable

Common future

- generally agreed vision, negotiated multifunctional outcomes
- Predictable practitioner integration
- Ongoing increases in technical/process integration & opportunities for implementation
- Coalition-based 'rational style' lobbying
- Practitioners use vision-based strategies to achieve goals
- Intra-sectoral role integration
- Collegial cross sector relationships
- High government & community capacities

Stable

Collaborative

Rival visions

- Contention between network-level visions, 'strategic' multi-functional outcomes,
- novel practitioner integration,
- fluctuating arrangements for technical/process integration & opportunities for implementation
- coalition-based politicised lobbying
- practitioners exhibit interest-partnership based strategies to achieve goals
- intra sectoral diversified integration
- interest based cross-sector relationships
- variable/siloed government & community capacities

Collaborative

Unstable
