

Dannielle Graham

Dannielle's background is in environmental science. She is currently researching forest conservation in Cambodia part-time to complete her Bachelor of Environmental Science (Honours).

Her motivation for constant improvement comes from seeing first-hand the debilitating destruction of tropical rainforests. While working as a Guest Researcher at the University of Copenhagen, to mitigate deforestation and empower indigenous communities, her focus pivoted toward development projects that are socially and environmentally ethical.

After two years volunteering with EIANZ's Victoria Division as the Mentoring Program Coordinator and Student Engagement Officer for Deakin University, Dannielle is proud to join the Central Office team to implement EIANZ Steps the much anticipated early-career training program. Supporting young professionals is a key component to creating the strong and ethical workforce of environmental practitioners needed to tackle wicked problems.
