

IANZ 2024

NATURE POSITIVE CITIES SYMPOSIUM

Tuesday 26 March - Wednesday 27 March
Sheraton Grand Sydney Hyde Park
161 Elizabeth Street, Sydney

DAISY HESSENBERGER

Global Sustainability
Partner – Nature &
Biodiversity, Arcadis, UK

ABSTRACT

An Evidence-base for Achieving Canopy Cover Targets - How Many Trees? How Much Space? What Required Resourcing? and Where to Prioritise Plantings? New Tools, Approaches, and Case Studies

SPEAKER BIOGRAPHY

Daisy is a global subject matter expert on nature and biodiversity at Arcadis where she provides thought leadership on the role of Nature-based Solutions in working towards an improved quality of life. Prior to Arcadis, her time at the International Union for the Conservation of Nature saw her lead the development of the Global Standard for Nature-based Solutions. Daisy is a scientist in training a PhD in Evolutionary Genetics, which she still manages to put to use today as she continues to work on the resilience of complex systems, even if the system in this case is our built environment instead of unicellular algae.
