Environmental Policy,  
Minerals Council of  
Australia

## ABSTRACT

---

### Australian minerals industry role in a nature positive future

We will demonstrate that net gain and nature positive are two distinct objectives. When aiming for 'nature positive' outcomes, Australia's minerals industry will play a crucial role, not only for Australia but also for global nature positive objectives. The role of offsets in the Australian minerals sector will play a key part in Australia's contribution to a nature positive future.

## SPEAKER BIOGRAPHY

---

Steven Brown is a leading voice in responsible supply of metals. He specialises in battery metals supply chains, and has held global roles for major mining companies.
