

MOVING BEYOND TRANSITION  
6 – 8 November 2024 | Sydney

## ABSTRACT

### How is AI Shaping the Sustainable Future?

Artificial intelligence has moved beyond the hype. It touches everything. It’s transforming everything. And it continues moving rapidly. AI is a paradox of productivity and excess. We go beyond AI’s current capabilities and limitations, from the profound impacts on jobs and skills demands to how organisations can responsibly steer emerging technologies to benefit business and society. You will hear about cases of great promise for sustainability and conservation, and why AI raises new concerns.

**DR. SANDRA PETER**  
**DR. KAI REIMER**  
Co-Directors of  
Sydney Executive Plus

## SPEAKER BIOGRAPHY

Dr Sandra Peter and Dr Kai Riemer are Co-Directors of Sydney Executive Plus and professors at the University of Sydney Business School. They are renowned experts in business, emerging technology, artificial intelligence, generative AI, and the future of work.

Together, Sandra and Kai form an exciting duo, combining their extensive knowledge and insights with an entertaining and accessible style, to tackle the challenges and seize the opportunities of the ever-evolving business landscape. Their uniquely dynamic event offerings span productive engagement with the future and understanding the profound impact of emerging technologies, such as AI, on both business and society.

Dr Sandra Peter has spearheaded strategic initiatives and collaborated on executive programs with highprofile organisations, across business, government, and defence. Her research expertise lies in strategic foresight and the transformative influence of emerging technologies, with a focus on AI. She is a co-host of influential business and technology podcasts and a published author in high impact journals. She regularly contributes commentary and interviews in national and international media.

With a background in AI, collaborative systems, and strategic foresight, Professor Kai Riemer brings a wealth of expertise in disruptive phenomena and envisioning the future of work. He boasts an impressive track record of industry-funded research, high-impact projects, and publications in esteemed journals.

Sandra and Kai are highly sought-after advisors to corporate boards and prolific public speakers, captivating audiences with their insights on the business potential of AI, AI and the future of work, the dark side of AI, the trust economy, digital disruption, strategic foresight and future trends.
