

CERTIFIED ENVIRONMENTAL PRACTITIONER SCHEME

2024 SERVICE AWARD

The CEnvP Scheme Service Award celebrates the outstanding volunteer contribution an individual has made to the values, success, and development of the Certified Environmental Practitioner (CEEnvP) Scheme in the areas of initiative, positive leadership, reliability, and technical values. Congratulations and thank you to this year's winners, **Joanne Flint FEIANZ CEnvP** and **Warren Pump FEIANZ CEnvP-SC**.

JOANNE FLINT
FEIANZ CEnvP

Joanne Flint is a Certified Environmental Practitioner with more than 30 years of broad experience internationally, nationally and in all Australian states, working on operational facilities and project developments and in corporate and governance environments. She has worked in technical, management and leadership roles with companies, governments and communities and in many industries including energy, water infrastructure, oil and gas, mining and minerals processing, chemicals and manufacturing.

Joanne has led and managed teams of environmental and social professionals in delivering EISs, environmental policy, environmental management and compliance systems, environmental risk assessments, plans and audits, and organisation-wide environmental technical services. She has chaired and been a member of several environmental forums and advisory committees.

Joanne has an engineering background which includes environmental and risk engineering. She was awarded Fellow of Engineers Australia in 2013. Joanne has a strong interest in transformational change, sustainability and biodiversity conservation. Her current focus is on providing strategic and risk management advice and services.

WARREN PUMP
FEIANZ CEnvP-SC

Warren Pump is the Principal and Director of Salient GeoEnvironmental, based in Melbourne. Warren has more than 35 years of professional experience in the management of a wide variety of projects in the fields of environmental and geotechnical engineering for urban renewal and in waste management. His project management experience includes the planning, assessment, design, construction and performance review of the clean-up of polluted industrial land; urban infrastructure development; and the management of multi-disciplinary environmental projects.

Warren's experience extends Australia-wide, as well as many countries in NE and SE Asia. Warren is an EPA-accredited Environmental Auditor (Contaminated Land) in Victoria, a Fellow of Engineers Australia, a member of EIANZ and a former President of the Australian Contaminated Land Consultants Association (Vic) Inc.
