

Dr Dan Evans

Dr Dan Evans is a senior associate environmental scientist with twenty years' experience in both the research and environmental consultancy sectors. He focuses on linking environmental monitoring studies to justifying improvements in water and catchment management. In particular, Dan is a specialist at elucidating the source, fate and environmental impact of contaminants to down-gradient receiving waterbodies in both rural and urban settings.

He has a large amount of experience working on agricultural, development, natural resource, transport and urban runoff studies in Africa, the Americas, Australia, Europe, New Zealand and the UK.

He is one of only five Australian-based scientists nominated onto the WHO Asia-Pacific Expert Panel for the Drinking Water Quality Knowledge and Advisory Service. Dan is the environmental sciences capability lead for Beca-Australia and is based in their Sydney office.
