

Getting off the Ground

Environmental applications of Drones

An evening forum by the Environment Institute of Australia and New Zealand - South East Queensland Division

Register early to secure your place

EVENT DATE: Monday, 6 November 2017

TIME: 5.30pm to 8pm
(Registration from 5.15pm and
Networking drinks from 7pm – 8pm)

VENUE: Jacobs, Level 7, 32 Cordelia St, South Brisbane

Register: Online at www.eianz.org – click on Events, SEQ

Embracing technology can be costly, but so can ignoring it. The use of Drones for surveillance, modelling and location video/photography has reduced field hours and required equipment and has allowed access to sites that have either been too difficult or dangerous to access. Join us for an interesting evening looking at the application of drones – what they can do, what results they produce and how they can be used to enhance your project outcomes.

This event will investigate:

- Current technologies available including samples of use in the field
- The range of use for Drones in a project and how that can translate to cost savings
- Legal aspects associated with drone use
- How drone technology has given access to area's previously inaccessible (the use of drones in natural disasters)
- Future technologies and applications for drones

Speakers & topics will include:

Tony Gilbert

Qld Drones
Modelling and Surveillance

Lee Carseldine

Drone it
Photography and video use

Thomas Tadrowski

UPG Solutions
Current and future technology

Briar Francis

HopgoodGanim
Regulations of Drones in Qld

Who should attend?

Environmental professionals who use or plan to use Drone technology. University students, Spatial/GIS Professionals and project managers will also find this event of interest.
