

**Andrew Mattes**  
**Senior Specialist Air Quality and Greenhouse**

Andrew is a Chemical Engineer with over 25 years' experience in environmental assessment, policy and regulation.

Andrew is the Senior Specialist Air Quality and Greenhouse in Environment and Sustainability Branch in Safety, Environment and Regulation Division.

Andrew joined Roads and Maritime Services in 2013, and was the air quality subject matter expert for the environmental assessment of over \$20 billion dollars of motorway tunnel projects, as well as providing secretariat support to the Advisory Committee on Tunnel Air Quality, and developing the air quality policy framework to support the assessment, construction and operation of our growing motorway tunnel network.

Prior to joining RMS, Andrew worked for the NSW EPA for 21 years.

For the last two years, Andrew has been leading the development of Future Energy – Transport's Policy to transition Transport's operations - and the transport sector - to net zero carbon emissions.

Outside of work, Andrew is a bit of a mad cyclist and metalhead.
